Cute Reminder Standard For PC

Cute Reminder may not be as colorful and cute as the name suggests, but it can still be a fun way to jot down notes, ideas, and reminders. Tech-savvy: Cute Reminder is a no-nonsense, yet high-quality application that does not try to pull off any fancy tricks. The app is simple, yet still pretty cool. Features: Cute Reminder has the ability to remind you about yourself or someone else, about an upcoming event, a birthday, a school assignment, or even a letter that you need to write. What's New Version 1.0.2: Fixes issues with the new setting when the reminder time doesn't start from the beginning of the week. Ratings and Reviews I just bought this app for a friend and he's loving it. He's currently jotting down notes in here and it's definitely worth it. Very simple to use and set-up. No advertising here, just a simple, straight-forward app. Can't ask for much more. 5/5 Expected so much more. it's a great concept and just doesn't deliver. Like all the other reminders in the app, just the text isn't there. Kind of hard to use for notes if there is no information to be jotted down. 2/5 While the concept is good, I actually liked the free version more, for it being easy to use and having more options. Now, I will use the paid version when I need to write something down, but it's not for every use. There are so many better options than this, but for a low price, I should have seen this coming. 2/5 Its simple, well organized and a bit cute! Posted 12/3/2015 victoriaq 4 out of 5 stars I really like the idea of this app. I have a habit of waking up late, and then just having so many thoughts in my head that I just need to write them down and forget about them. Cute reminder is the perfect app to do so. It's simple to use, no bells or whistles but just functional. Edit: I updated the app the day I published this review. Now,

I can't scroll through my calendar. The cost has been increased to $2.99. I had a cheap version of the app for $.99 before, 2edc1e01e8
