Is it possible to treat these symptoms with oral contraceptive pills (OCPs)? OCPs are used to treat symptoms of PCOS. Though there are many OCP formulations available, the most commonly used OCP, ethinyl estradiol (EE) + levonorgestrel (LNG) is a combination estrogen/progestin pill that is thought to reduce acne. OCPs are extremely effective for the treatment of hirsutism in PCOS. OCPs may be used for up to 3 months, and should be taken daily to achieve their effect. Very few side effects are associated with OCP use. However, there are rare instances where pregnancy can occur. Note that the use of OCPs may increase the risk of heart disease in women with a history of heart disease. OCPs have also been linked with an increased risk of venous thrombosis (blood clots).The Prime Minister's Office refused to tell what happened to a $630 million funding proposal to help train Syrian refugees after ff5e5ca8c9
