so here is the download link. if you would like to support me, you can patreon or paypal or if you want to just help

me, you can paypal or even twitter or if you just want to say hello, you can patreon. the super mario 64 texture pack is a very simple and easy to understand texture pack. it does not improve the game in any way other than giving it a more realistic look. it was however the first to use cell shading textures, which is currently a new feature in games. i was surprised that there was a texture pack for the original paper mario as i never even played it. it looks like the textures here were originally designed for the enhanced version of the game super paper mario released on the 3ds. the super paper mario texture pack is far from perfect. it does not really improve the game and it's pretty obvious that the textures were specifically designed for the enhanced version of the game. it does have a few interesting features such as the back side of the character and the shadows which have been made a bit brighter. this could be seen as a good thing or a bad thing depending on your preference. overall, the super paper mario texture pack is a great piece of work. its not easy to find a texture pack for the original version of paper mario and this one does a great job of bringing the game back to the original graphics. this super paper mario texture pack gives the game a much more anime look, making the game more appealing to people who are not too keen on the original graphics. the only problem is that the texture pack is not perfect. there are some artefacts which can be seen in the screenshots below. 5ec8ef588b
