EASEUS Data Recovery Wizard 13.2 Crack with License.Q: Html.ActionLink after HttpPost actionresult I am using ajax to post two values to my server and then I am using the Html.ActionLink to move to a page from that server. the problem is that if I go to the server it first shows the success page (the page where I called the ajax) before it redirected to another page. What I want is to show the the second page from the server on button click and then redirect, I tried to add a redirect, but it can not find the page because it redirects from success page to it, I tried to put the Response.Redirect() inside the OnSuccess method but it cant find the
