Programming with Java - Ebook written by E Balagurusamy.Effects of mebeverine on isolated contractile activity of guinea-pig ileum. The effects of a new selective Ca²⁺-antagonist mebeverine were studied on isolated guinea-pig ileum. Mebeverine shifted the concentration-response curve for KCl to the right and attenuated the contractile response to ACh. Mebeverine shifted the concentration-response curve for the phorbol ester [1aR, 3aR, 4zR]-4 alpha-phorbol-12,13-didecanoate (4 alpha PDD) to the right and attenuated the contractile response to A23187. Mebeverine slightly increased the maximal contractile response to 4 alpha PDD and decreased the maximal contraction to A23187, by a mechanism that probably was not directly Ca²⁺-antagonistic. Mebeverine shifted the concentration-response curve for veratridine to the right and reduced the

contractile response to KCl. The effects were less marked than those of (+)-tubocur f988f36e3a
