Download

Brother Printer Check by Firmware Up To Date Qty.: How to perform a Warranty Check by Firmware Up To Date on the Brother Printer? To perform a warranty check by firmware update on the Brother printer; first you need to locate and follow the instructions below: Restart the Brother Printer from the OFF position, and then press and hold the UP | DOWN | RIGHT | LEFT buttons for five seconds to switch to the Control Panel. The LCD on the Control Panel will display the firmware version. The firmware version consists of a large number with a small version in the center. Below the large number is the firmware version in the small format. Brother Printer Firmware Version: Replace the old firmware with the latest version. The software that you will need to download is called Flash ROM Firmware. Download the latest Flash ROM Firmware from the Brother Web site: NOTE: In the above mentioned link, you will need to enter the original serial number of your Brother printer. The serial number is located on the bottom-right corner of the printer box. When your printer is connected to the USB port of your computer, locate the "Go" menu in the Windows interface of your computer (e.g. Start Menu | Run). Select the command "lpadmin" without any quotes. This will open the Local Printer Setup Utility. In the Local Printer Setup Utility, locate the "Brother" printer icon and right-click on it. A pop-up menu will open. Select "Advanced Settings". In the new window, locate the "Brother" printer icon again. Select the "Upgraded Software" tab and then the "Download Brother Upgrade Flash ROM" button. Locate the link titled "Upgrade Firmware" and follow the installation instructions. Brother Printer Upgrade Firmware: Follow the instructions in the Brother upgrade tool. These instructions should be easily downloaded from the Brother Web site: Brother Printer Upgrade Firmware: Once the upgrade is complete, exit the Brother upgrade tool and restart

the Brother Printer from the OFF position. Brother Printer Firmware Upgrade Result
